Need help with your study?

We can provide complete questionnaire research consulting services.

- Complete packages start at \$4,500

Try it out at: http://www.onlinesurveyhost.com/Online-Sample/Sample-online_survey_e.html

How it Works:

This entire process takes from 2 to 6 weeks.

1. SurveyWorks assists you by editing or making suggestions for question wording.
2. SurveyWorks programs the questions and a testing site is created for you to review the survey.
3. The survey is transferred to the live site and either a link is created on your site or email invitations are sent out (SurveyWorks can do this for you too at a small additional cost).
4. The survey is left up for 1 to 3 weeks to collect responses from your target group.
5. The data is summarized and if desired a detailed report is written. Data and reports belong to you.

Runs on Our Servers:

We have our own web servers to host the survey so you don't have to get your tech people involved. Send out an invite to your potential respondents or put a link on your web site to direct traffic to your survey.

Try our sample: http://www.onlinesurveyhost.com/Online-Sample/Sample-online_survey_e.html

Benefits:

1. Very cost effective
2. rapid turn around is possible
3. Survey runs on our dedicated servers, no need to have your tech staff involved
4. SurveyWorks can send out email invites from your list of potential respondents with a link (additional cost) or you can place a link to the survey on your web site.
5. Reporting turn around is very fast
